*Workshop on*

# *Early Management of Trauma: Nursing Perspectives*

*Organized by*

Departments of Emergency Nursing  
&  
Continuing Nursing Education & Research  
College of Nursing  
CMC, Vellore, Tamil Nadu

*Venue*

College of Nursing  
CMC, Vellore

*Date*

30<sup>th</sup> March 2022

## *Early Management of Trauma:*

### *Nursing Perspectives*

#### **Overview:**

Road traffic accidents are a leading cause of mortality and morbidity globally. Trauma is a leading cause of death in the first four decades of life. India recorded 3,54,796 cases of road accidents during 2020 in which 1,33,201 people died and 3,35,201 were injured (NCRB-2021). In a day 970 accidents happen and 365 die due to trauma. Every hour there is 40 accidents and 15 deaths on Indian roads. Tamil Nadu accounts for the large number of fatalities. Road Traffic Accidents (RTAs) have emerged as an important public health issue which needs to be tackled by a multi-disciplinary approach.

To be able to focus on the priorities in management of a trauma patient, a definite system needs to be implemented. The advantage of such a system is that priorities are established and as every member of the team follows the system, communication between team members is easier and more meaningful. The nurse being the integral part of patient care plays a pivotal role in the assessment, recognition, early and prompt management of patients with trauma which will reduce the severity, mortality and morbidity.

This workshop aims to equip the participants with the early management of trauma skills which will empower the nurses to provide a system based initial nursing care.

#### **Objectives:**

Participants will be able to

- Enhance nursing care using a system based approach towards care of trauma patient
- Empower nurses to act independently to identify and intervene life threatening conditions in patients with trauma
- Promote comprehensive in-hospital mass casualty management
- Provide avenues for participatory leadership in management of patients with trauma.

#### **Key Features:**

- **Essentials of the topic** are addressed at the end of each session as main points.
- **Practice tips** throughout the workshop to assist with assessment of trauma patients, emergency lifesaving procedures and communication skills.
- **Case studies are supported by questions and answers** to encourage active learning.
- **Simulation of cases** to help nurses gain confidence to identify life threatening conditions, prioritize and intervene appropriately.
- **Hands on skill station** to equip the nurses with skills needed for early management of patients with trauma.

## *Organizing Committee*

#### **Patrons**

- **Dr. Vathsala Sadan**, Dean, College of Nursing, CMC, Vellore.
- **Dr. Bala Seetharaman**, Nursing Superintendent, CMC, Vellore.

#### **Organizing Chairperson**

- **Mrs. Jeyalinda Christopher**, Professor & HOD, Dept. of Emergency Nursing, CON, CMC, Vellore
- **Dr. Vinitha Ravindran**, Professor & HOD, Dept. of CNE & Research, CON, CMC, Vellore

#### **Organizing Secretary**

- **Mrs. Sheeba Rani Nelson**, Professor, CON, CMC, Vellore. 8056600385

#### **Organizing Team**

- Mrs. Sheeba Paul, M.Sc (N) Tutor
- Mr. Ruban David. P, M.Sc (N) Tutor
- Mrs. Sri Ranjani, B.Sc (N) Tutor
