2.3.3- Webpage describing the “LMS / Academic Management System”

CONCMCV predominantly uses Microsoft teams to enable the online teaching-learning process. MS Teams is a unified and collaborative platform that helps to organize and manage video conferencing, communication, assessments, teams & classrooms online. It helps to organize students' class work and virtual classrooms. This platform renders provision for administration, documentation, tracking, feedback, grading, reporting, automation, and delivery of educational content to our students. MS Teams has the provision for setting up collaborative classrooms, personalizing learning with assignments, connecting with colleagues in Professional Learning Communities, and streamlining faculty communication. Zoom platform is utilized for PG education.

Moodle is another teaching and learning platform that is mainly used for training PG students. It supports a range of media to present or link learning materials, support the learners, and assess their learning. This is used for communicating and collaborating with our PG students, using the course forums. Learners are encouraged to discuss topics and share ideas and feedback on a topic via this platform.
