

Module 3– Targeted Therapy

- * Biological response modifiers
- * Monoclonal antibodies
- * Cancer vaccines
- * Gene therapy
- * Nurses role in targeted therapy

Module 4– Central Venous Access Device Care and Maintenance

- * Classification of Central Venous Access Devices
- * General guidelines for vascular access care
- * Central Venous Access Device care and maintenance
- * Complications– Identification & Management
- * Nurses role in CVAD care

Methods of Evaluation:

Theory:

- * End of Module Test - 25 marks
- * Final Test - 75 marks
- * Total - 100marks

Clinical Practice:

- * Completion of Log book - 20marks
- * Clinical Evaluation - 5 marks
- * Practical Exam (OSCE) - 25 marks
- * Total - 50marks

Criteria for Certification in Chemotherapy:

1. 75% marks scored in theory and 80% in practical exam
2. 100% attendance during the course
3. Satisfactory completion of the log book during the course

DEVELOPMENT

SHORT COURSE ON CHEMOTHERAPY

Sixth Batch
March 17th, 2025
to
April 19th, 2025

Conducted by
College of Nursing
CMC, Vellore.

Preamble: This short term course in Chemotherapy is designed to prepare registered nurses to be specially trained in administration of chemotherapy and management of patients on chemotherapy. Nurses undergoing this course will be able to function as chemotherapy nurses in hospitals and day care chemotherapy units. She/ He may also function as chemotherapy nurse coordinator in tertiary care cancer centres.

Objectives of the Course:

The course participants will be able to

- * Understand the risk factors, biology, cancer development, diagnosis and prevention of cancer
- * Classify the cytotoxic drugs used in cancer treatment
- * Follow the safe handling principles of cytotoxic drugs
- * Calculate chemotherapeutic drugs accurately
- * Reconstitute and administer chemotherapeutic drugs
- * Identify and intervene anaphylaxis, extravasation and spillage of cytotoxic drugs during chemotherapy administration
- * Manage regimen related toxicities and provide nursing care using nursing process
- * Explain the targeted therapies that are being used in cancer management
- * Describe the Central Venous Access Devices and its care
- * Demonstrate the Central Venous Access Device dressing
- * Counsel patients and families on home care and follow up after chemotherapy administration
- * Provide comprehensive, evidence based and individualized nursing care to patients undergoing chemotherapy incorporating the acquired knowledge and skills

Eligibility

1. Nurses with GNM, B.Sc or M.Sc qualification

Organization of Course

Duration: This is a short term course of 4 weeks duration.

Total Hours: 180 hrs

Hours allotted for theory: 60 hours

20 hours x 2 weeks = 40 hours

Online learning through videos, scenarios &

Assignments (completed in module) =20 hours

Hours allotted for clinical practice: 120 hours

Onsite clinical practice= 100 hours

Onsite skill demonstration, case presentation, drug presentation = 20 hours

Delivery of Content

The content will be delivered in 4 modules that enable trainees to meet the learning objectives through self-directed learning followed by two weeks of intense, guided skill training in chemotherapy unit of the hospital.

Each module will comprise the following:

- * Narrated power point presentations
- * Videos demonstrating procedures
- * Reading material
- * Quiz/ Test
- * Clinical case discussion

Module Contents

Module 1– Overview of Cancer

- * Theories of cancer
- * Epidemiology

Etiology

- * Cell cycle
- * Proliferative patterns
- * Tumor classification
- * Biology of cancer
- * Carcinogenesis
- * Mechanism of metastasis
- * Grading and staging of cancer
- * Cancer prevention
- * Diagnostic methods in cancer detection
- * Treatment modalities
